

CONDITIONAL STATEMENTS IN C

Gagandeep Singh

[COMPANY NAME] [Company address]

If Statement in C

1. What are the conditional statements in C programming language explain with the help of a flowchart.
2. Write a program in C to print “Welcome to GNA” if we press a multiple of 5.
3. What will be the difference in outputs of the following psudocode explain working in detail

<pre>If(a>10) { print “This is a demo program” print “You have done well!!” } Print “Thanks for using C language”</pre>	Inputs: A = 07 A = 100
<pre>If(a>10) print “This is a demo program” print “You have done well!!” Print “Thanks for using C language”</pre>	Inputs: A = 07 A = 100
<pre>If(a>10); { print “This is a demo program” print “You have done well!!” Print “Thanks for using C language” }</pre>	Inputs: A = 07 A = 100

4. Write a C program for an automated irrigation system which will automatically turn on the water if the humidity is less than 30% and temperature is more than 40 C. (use pump on and off as the display output only).
5. Write a program which will print “Hi!! Welcome to GNA” when the input from user is “hello”.
6. What will be the output of the following code:

```
int a;  
if(a=='a')  
{  
    print "You have entered correct...."  
}  
print "Good Luck ..!!!"
```

Inputs:

A = 97

A = 100

if-else statement in C

7. Write a C program to find the greatest of two numbers. Explain with the help of the flowchart.
8. Write a C program to enter the salary of 5 employees (without using for loop), if the salary of the employee is greater than 10 lakhs then the increment will be 10% of the salary else the increment of the employee will be 20% of his current salary. Print the new salaries of the employees.
9. Write a C program that will turn on the light if the input from the button is 1 or the sensor input is 1 else turn off the light in case both these inputs are zero.
10. Write a program which will warn if the patient is a victim of a disease if his temperature is more than 102 and he is having flu.
11. Write the output of the following code explain with example:

```
int a;  
if(a>10)  
    print "hello sir/mam"  
    print "Welcome to GNA"  
else  
    print "have a good day ahead"
```

Inputs:

A = 9

A = 100

12. Explain the output of the following code

```

int a;
if(a>10)
{
    print "hello sir/mam"
    print "Welcome to GNA"
}
else
{
    print "have a good day ahead"
}

```

Inputs:

A = 9

A = 100

13. Explain the output of the following code

```

int a;
if(a>10);
{
    print "hello sir/mam"
    print "Welcome to GNA"
}
else
{
    print "have a good day ahead"
}

```

Inputs:

A = 9

A = 100

14. Explain the output of the following code

```

int a;
if(a>10)
{
    print "hello sir/mam"
    print "Welcome to GNA"
}
else;
{
    print "have a good day ahead"
}

```

Inputs:

A = 9

A = 100

15. Write a code in C programming language that will take input from the user to detect if a person can get a driving license or not based upon the parameters of his age, eyesight and driving test result.
